

PRESCRIPTION VALIDATION, COUNTING AND FILLING SYSTEM

eyecon™ 9420

**THE instrument to
count and validate your
inventory of narcotics**

The EYECON is a unique **Visual Counting System™**. A camera mounted above a counting platter captures photos, to count pills five times per second, to count, validate, complete a prescription or to conduct regular physical inventory.

**SAFETY
SPEED
ACCURACY
CONFIDENCE
VERSATILITY**

**UP TO
76%
FASTER AND
SIGNIFICANTLY
MORE ACCURATE
THAN MANUAL
COUNTING**

KEY BENEFITS:

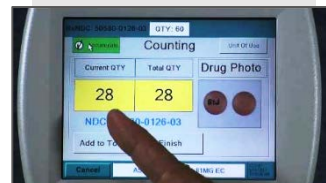

- **Improves Rx accuracy**, resulting in **improved inventory control** and **saving** an average pharmacy thousands of dollars per year.
- Helps ensure that the **medication dispensed** into the vial **matches** what is on the **prescription**, by associating the stock bottle barcode to the one on the prescription.
- **Database** of over 15 000 DIN's and over 6 000 DIN's have **colour photos**
- 2 year limited warranty

Rx validation mode:

The Eyecon helps ensure that the medication dispensed into the vial matches what is on the prescription.

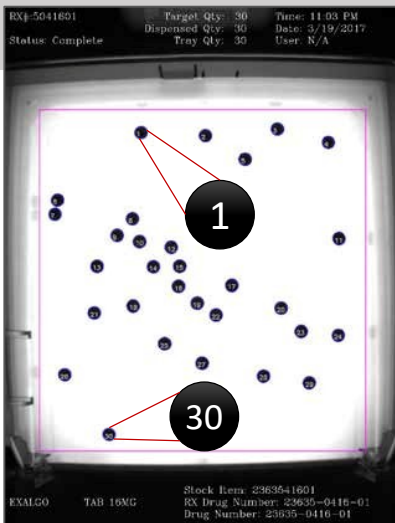

1. Scan Rx label barcode containing DIN, quantity & Rx Number
2. Scan barcode on stock bottle
3. Verify - Eyecon will proceed to a count mode to match Rx label & stock bottle
4. Count pills – Pour pills onto tray
5. Dispense
6. Fill vial

Safety & Count Validation:
Recognizes and identifies foreign matter and tablet fragments.

Physical inventory mode:

Conduct physical inventories more frequently.
Especially useful for **narcotics**.

Eyecon quickly counts pills from stock bottles and records the results in a database.

Traceability: Export data to a USB jump drive and import into a spreadsheet for inventory management/reporting.
