CLEANROOM AND COMPOUNDING EQUIPMENT

CLEANROOM

MODULAR CLEAN ROOM SYSTEMS

DFMZ PharmaMod 1.5 797 or Foamed in Place (FIP)

For compounding pharmacies and GMP compliant compounding facilities. Completely customizable to meet your environments and business needs while achieving NAPRA, USP <797> and <800>, or GMP standards.

- Heavy-duty, anodized, extruded aluminum frame
- Ceiling height up to 16 feet, sliding/swing door, gauge panels
- Solid white polypropylene and clear acrylic inserts

Design-Aire HEPA-filter fan modules

Custom design that fits particular space and process flow

Gauge panels complete with room pressure monitoring and light switches

MISTERIUM® Modular Cleanroom System

Grifols Misterium® modular cleanroom system offers significant financial and performance advantages over traditional cleanroom solutions.

Misterium is designed to meet the demands of the most stringent medical and aseptic environments. As a result, it is the solution of choice by many biomed, life science, biotech, medical device, nutraceutical, and pharmaceutical facilities.

- Modular design facilitates efficient installation and can be customized to fit any size space
- Flush ceiling system with wide hangers allows easy access to mechanical systems without disrupting the cleanroom
- Interior wall panels attach flush to ceiling panel surfaces
- Studless utility and liner wall options
- Aluminum honeycomb panel core
- Antimicrobial uPVC surfaces, coves, and chemically cold-welded seams
- Virtually flush seams for effective sanitation, wash-down, and fumigation
- Multiple flush door, window, and access openings, as well as various hardware options

PHARMACYKEEPER Pharmacy Software Applications

The PharmacyKeeper portfolio of products is a web-based application for improving key pharmacy operational processes and assisting organizations in becoming NAPRA compliant.

A scalable suite of solutions providing IV workflow and camera verification, activities, and training management.

Expertise focused on helping hospital and centralized compounding pharmacies gain strategic, sustainable control of their IV compounding environments.

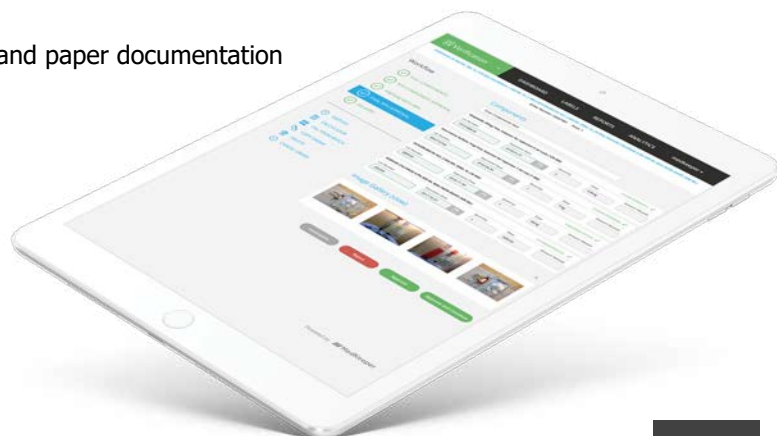

Defined compounding processes that include barcode validation and remote verification

Improved communication and reduced cleanroom traffic and paper documentation

600 000 activities managed per month
2 million doses processed per month
45% reduction in medication turnaround time

KIRO® ONCOLOGY

Automated Compounding for Intravenous Oncology Treatments

KIRO® Oncology is the next-generation system for compounding of sterile preparations of oncology drugs, including chemotherapy and biologicals.

- Two robotic arms perform separate tasks simultaneously
- Self-cleaning for decontamination of hazardous chemicals
- Syringes, final containers, and drug vials from different manufacturers can be used simultaneously
- Lean design minimizes the movement of disposables in the compounding area

Protects from repetitive stress injuries and from exposure to hazardous drugs. Opens only for loading and unloading, and is closed during the entire compounding and cleaning processes

Performs gravimetric controls at each step of the compounding process and releases final products based on their accuracy to the prescribed dose

Can prepare both patient-specific and small batches using liquid or lyophilized drugs

Regulatory Compliance

KIRO® Oncology helps in compliance with USP, GMP, and NAPRA regulations by standardizing aseptic compounding procedures, facilitating personnel and process qualification, and minimizing risks when preparing hazardous admixtures.

FUNCTIONS	SPECIFICATIONS
DIMENSIONS	6.7' (W) X 3.7' (D) X 7.2' (H)
MINIMUM CLEARANCE	9.8' (W) X 8.2' (D) X 8.2' (H)
WEIGHT	1200KG
MINIMUM FLOOR LOAD RATING	200 KG/M ²
AIRFLOW RATE	400 M ³ /H
POWER	230 VAC ± 10%, 50HZ, 3KVA, 13 A (120 VAC ±10%, 60HZ, 3KVA, 25 A)
ELECTRICAL SAFETY	UL LISTING MARK PER IEC 61010 AND EMC CERTIFICATION PER IEC 61326-1
OTHER	ETHERNET PORT

LAMINAR AIR FLOW HOODS Horizontal or vertical

VCM series Vertical Laminar Air Flow Hoods or HCM series Horizontal Laminar Air Flow Hoods create the ideal environment for excellent product protection, where particulates are not harmful to the operator, with multiple sizes to choose from.

- Fluorescent task lighting, sliding face shield
- Fixed or hydraulic base frames available
- Narrow profile, plug-and-play design
- Vertical LAFH in 4’ or 6’ lengths

NXT COMPOUNDING EXTRACTION HOOD Fume, particulate and vapour extraction enclosure

NXT Compounding Extraction Hood provides the highest level of operator and environment protection from harmful contaminants while weighing non-sterile powders and compounds. Multiple filtration options available to meet your non-sterile compounding needs. Dual HEPA, External Exhausted, and Carbon filtration are all available.

- Operator protection
- Particulate filtration and corrosion resistant
- Independent operation

MINI VERTICAL LAMINAR FLOW HOOD Clean air in a unique small size

DFMZ’s VBM-200 Mini Vertical Laminar Flow Hood is built to provide clean air just about anywhere. Its unique size and quality make it a great addition to limited lab spaces.

- Minimum ISO 5 (Class 100) conditions
- Full-featured unit in a portable size

High Efficiency Particulate Air (HEPA) filter, rated at 99.999% efficient at 0.3µ

PRODUCT #	DESCRIPTION	QTY
DF-VBM200	MINI VERTICAL LAMINAR HOOD	EACH

FUNCTIONS	SPECIFICATIONS
WORK ZONE DIMENSIONS	19.0’ (W) X 13.4’ (D) x 14.5’ (H)

WEIGHT	57KG

PROTECTIVE APPAREL

COMPOUNDING PERSONAL PROTECTION EQUIPMENT (PPE)

NON-HAZARDOUS COMPOUNDING (PPE)

GLOVES

Our gloves are latex and powder free to meet cleanroom requirements.

- Sterile and non-sterile options available
- Polychloroprene, nitrile, or neoprene formulations

FROCKS AND GOWNS FOR IV PREPARATION

These frocks and gowns are designed for cleanroom environments.

- Breathable, fluid resistant, low lint
- Sizes up to 10X available, for full coverage and flexibility
- Choice of lowest cost, lightweight, or superior style with thumb loops

Products manufactured from low-linting fabrics and with clean packaging to eliminate the hazards of airborne contaminants

COVERALLS

Tested against permeation standard ASTM F739-12 (for maximum chemo protection the coverall is made to be used combined with BioClean-C apron on next page)

- Sterile coveralls and accessories are also available.

SHOE COVERS AND BOOTIES

- Regular/Large fits up to men's size 12; X-Large up to size 15

CritiGear™ Frock

CHEMO GLOVES

Chemo Gloves have been specifically designed for pharmacy environments and tested per ASTM_D6978-05.

- Latex and powder free
- A selection of sterile and non-sterile chemo gloves
- Textured and allow easy double-donning

CHEMO GOWN

CritiGear Gowns: Tested against permeation standard ASTM D6978-05

BioClean-C Apron/Gowns: This garment closes in the back, but has an open back. It can be worn as an apron with sleeves over a coverall or as a gown.

- Available sterile and non-sterile

Products manufactured from low-linting fabrics and with clean packaging to eliminate the hazards of airborne contaminants

Meets the highest standards for personal protective equipment

CHEMO SHOE COVERS

Disposable, latex-free, non-skid, breathable, lightweight, durable, and impervious to liquids. Offer increased contamination control prevention in cleanrooms.

CHEMICAL CARTRIDGE RESPIRATORS AND ACCESSORIES

Vapors, gas, and particles protection

A chemical cartridge respirator with a pre-filter must be worn in the presence of vapours, gas, and particles (e.g., dust) or if there has been a spill.

We offer also various cartridges according to the chemical, decontamination after a spill, and the various cleaning agents that are used to clean, disinfect, or decontaminate the C-PEC.

- Three models available in small, medium, or large
- Full face/half face mask; lightweight, balanced design
- Visor, headgear, cleaning pads, and cartridges available

SYRINGE INFUSION

ESP60 SYRINGE PUMP™

The Syringe Pump Infusion is a proven, viable clinical alternative to minibag drug delivery. The ESP60 is designed to help you safely and cost-effectively transfer and deliver fluids.

- Durable, easy to use, automatic calibration, multiple speeds
- Alarms for occlusion, empty syringe, and low battery
- Unique encoder to guarantee $\pm 3\%$ accuracy
- Available in English or French

PROD. #	DESCRIPTION	QTY
EX-ESP	ESP60 SYRINGE PUMP	EACH

PREP MATS AND ABSORBENT PADS

Prep mats help stabilize the work surface for drug preparation and enhance workbench safety for technicians, nurses, and pharmacists when handling or administering chemotherapy drugs.

- Choice of premium (3 layers), standard (2 layers), or economy (1 layer)
- Sterile or non-sterile pads
- Added layers to retain and trap drug residue

SYRINGE TIP ADAPTORS

1

2

Syringe tip adaptors for batching and syringe-to-syringe transfer connectors

- EX-SA250: Recessed slip in the connection point allows users to change syringes quickly. Capped luer connection point reduces touch contamination and provides secure fit.
- II-57-13: Syringe connector (luer/luer) for syringe-to-syringe transfers requiring secure connection both sides (i.e., transferring chemo drugs)

PRODUCT #	DESCRIPTION	QTY	PICTURE
EX-SA250	SYRINGE CONNECTOR, SLIP/FEMALE LUER	250/CS	1
II-57-13	SYRINGE CONNECTOR, FEMALE LUER/ FEMALE LUER	100/CS	2

TRANSFER VALVE SETS

Transfer valve sets allow for withdrawal of various volumes of diluent or injectable medications into syringes.

Available with two-way valve mechanism to allow for syringe volume adjustment or one-way valve to eliminate potential for medication or diluent to re-enter the IV bag.

MR-3005

PRODUCT #	DESCRIPTION	QTY
AC-19TPV	TRANSFER SPIKE, VENTED, TWO-WAY CHECK VALVE	100/CS
AC-SM-013	LARGE NON-VENTED SPIKE W/ SMARTSITE® NEEDLELESS VALVE	50/CS
IU-CH10	CLAVE® SWABBABLE CONNECTOR, ACCESS DEVICE IV BAG, TWO-WAY CHECK VALVE	50/CS
MR-3005	TRANSFER SPIKE, VENTED, ONE-WAY CHECK VALVE AND SWABBABLE LUER ACCESS VALVE	100/CS
MR-3006	TRANSFER SPIKE, NON-VENTED, TWO-WAY CHECK VALVE	100/CS

MULTI-DOSE IV BAG RINGS

Durable, resilient, round plastic rings for keeping multiple minibags together during transport from pharmacy to nursing units in a CIVA program. Choice of colours allows for colour-coding system options.

- 10 colours available: black, blue, brown, green, orange, pink, purple, red, white, and yellow

PRODUCT #	DESCRIPTION	QTY
MD-PC2116	IV BAG RING	500/CS

QUALITY AND CONTAMINATION CONTROL TOOLS AND CLEANING SOLUTIONS

CLEANING AND DISINFECTANT PRODUCTS

STERILE 70% ISOPROPYL

Meets NAPRA requirements for cleaning biosafety hoods/chemo isolators, gloved hands, products, and equipment.

- Filtered to a 0.2µ and induction sealed to assure sterility
- Double-bagged and gamma-irradiated
- Evaporates, leaves low residuals

6.6.3 Introducing products and equipment into the cleanroom

6.6.4 Cleaning and disinfecting the primary engineering control

6.6.5 Aseptic technique for compounding sterile preparations

SURFACE SAMPLING

SAFECHEMO™

The kit includes everything to collect up to 12 samples and analyze up to 15 compounds per sample. (up to 1000 different compounds are possible)

Over a million analyses performed since 1982. Using the SafeChemo™ kit, you can accurately sample and measure HD surface concentrations and address NAPRA compliance, safeguarding patients, employees and the environment.

- 5-Fluorouracil
- Cyclophosphamide
- Doxorubicin
- Oxaliplatin
- Busulfan
- Cytarabine
- Etoposide
- Paclitaxel
- Carboplatin
- Daunorubicin

Bubble Point Tester and Syringe Filters

Filters used to sterilize pharmaceutical fluids must be approved for human-use and be pyrogen free with an nominal pore size of 0.2μ or 0.22μ. We offer the PALL HP1002 0.22μ sterilizing filters.

Filter integrity testing is also required following the sterilizing process. The Bubble Point test is designed to show that consistent flow of air will not occur through the filter prior to the manufacturer's listed "bubble point." The PG005 performs this filter integrity testing.

MEDICATION PACKAGING AND AUTOMATION

ORAL UNIT AND MULTI-DOSE PACKAGING SOLUTIONS

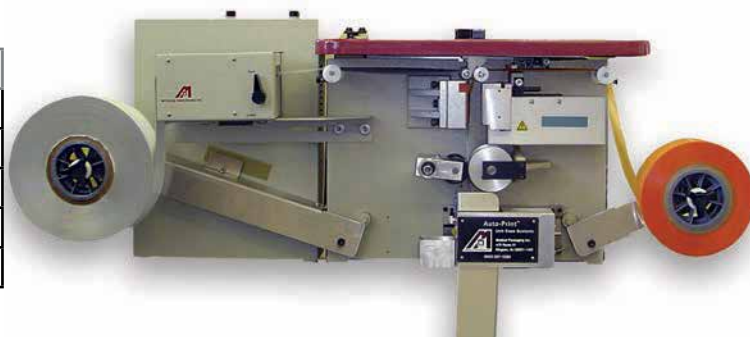

PACKAGING AUTOMATION

AUTO-PRINT® **Unit-Dose Packaging System**

Auto-Print® Unit-Dose Packaging System is a complete bar-coding packaging solution for oral solid medications. This high-performance, durable system eliminates the need for manual packaging and sorting of medication and is designed for simple maintenance and easy operation.

- Produces up to 60 packages per minute
- Includes custom Pak-EDGE™ Barcode Labelling Software
- Standard package size is 2" x 1.5", custom packaging option down to 1.5" x 1.5" to accommodate smaller Automated Dispensing Cabinet (ADC) size
- The optional variable length feature adds the capability to change the package length in real time. (1", 1.12", 1.25", 1.37", 1.5", 1.87", 2.25")

FUNCTION	SPECIFICATIONS
DIMENSION	36" (W) X 15" (D) X 14" (H)
WEIGHT	65 LB
POWER	115 VAC 50 HZ OR 230 VAC 60 HZ, 320 VA
SEALING TEMP	200°F, NO DEGRADATION TO MEDICATION, NO FUMES
LENGTH AVAIL.	1", 1.12", 1.25", 1.37", 1.5", 1.87", 2.25"

AUTO-PRINT® **Oral Solid Feeder (OSF)**

Oral Solid Feeder (OSF) attaches to the Auto-Print™ to automate feeding of pills. Bulk medication is loaded into the feeder which will automatically feed the medication one at a time until all medications have been packaged, eliminating the need for manual hand feeding by the pharmacy technician for increased efficiency.

FUNCTION	SPECIFICATIONS
SIZE	15.5" (W) X 8.5" (D) X 3" (H)
WEIGHT	7 LB
POWER	115/230VAC, 50/60HZ, 70VA

AUTO-PRINT® **Bagging System**

The Auto-Print® bagging system is a bar-coding packaging solution for ampoules, vials and syringes. This solution provides the capability of loading, printing, bar-coding, and sealing medications in a few simple steps.

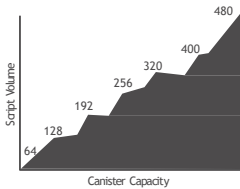

MEDICATION PACKAGING AND AUTOMATION

ORAL UNIT AND MULTI-DOSE PACKAGING SOLUTIONS

PACKAGING AUTOMATION

ATP®2 SERIES

The ATP®2 has once again leaped ahead of all the others in reliability, longevity, and features to drive efficiency and growth for our pharmacy partners. The ATP®2 is the industry's most comprehensive and accurate Rx packaging system.

EXPANDABILITY

Scalable machine grows as needs dictate canister sizes (64, 128, 192, 256, 320, 400, and 480). ATP®2 Mini available for smaller pharmacies.

POUCH VARIETY

Choose between four pouch sizes. Narrow and Wide packaging options available to meet your unit-dose or multi-dose needs.

GRAPHIC PRINTING

The most sophisticated printing on the market. Colour and vertical printing, pictures, barcodes, logos, icons, variable fonts and sizes are available through the easy-to-use label software.

DUAL TRAY SYSTEM

The only system that includes two integrated trays to continuously run exception drug filling without interruption.

REDUNDANT LOWER PACKAGER

Swappable lower packaging unit (LPU) allows for the majority of hardware issues to be resolved in a matter of minutes.

ATP®2 480

THE ONLY MACHINE TO FIT ALL YOUR NEEDS

AUTOSENSE™ SMART CANISTERS *

The software will direct the user to add or remove the canister based on the order formulary.

CANISTER CALIBRATION KIT *

Manage drug changes more efficiently by recalibrating your canisters in house.

1/2 TAB CANISTER DISPENSING *

Allows for certain high-volume 1/2 tabs to be run through canisters.

Combine the ATP®2 with the InspectRx™ for a complete verification.

The ATP®2 will improve your pharmacy workflow and increase throughput.

TESTIMONIAL

With the ATP®2 and InspectRx® we have enhanced our patient safety practices by having full traceability of medications to the bedside. We have been able to accomplish this and at the same time increase our productivity.

Edith Rolko B.Sc.Pharm R.Ph.

Director of Pharmacy

ATP® 2 SERIES ADDITIONAL ACCESSORIES

SMART TRAY RX™ LIGHTED TRAY FILLING SYSTEM (ULT-100)

The optional lighted tray system allows users to fill and check using barcode validation, light direction, and colour-coded reminders. Barcode scanning throughout the fill ensures the right drug and tray are being used for each batch.

SmartTrayRx™ is accurate, productive, paperless and safe.

SPOOLERS AND WINDERS

Automatically or manually spool pouches during the filling and checking process. Preserve the integrity of pouch strips, move, and store pouches from the ATP®2 with ease.

BULLSEYE® TABLET SPLITTER

Automatically cut tablets in half reducing damaged pills and providing more accurate doses to patients. When used in conjunction with the ATP®2 and InspectRx®, the BullsEye® reduces errors flagged in the tray fill or image verification process.

POUCH VERIFICATION

INSPECTRX® POUCH VERIFICATION SYSTEM

InspectRx® is an innovative system of imaging and medication pouch analysis for use with the ATP®2 Series. Manual checking of pouches is greatly reduced through electronic sorting and analysis to ensure that the right pill is in the right pouch for the right patient. InspectRx® closes the loop on quality control and communication with your staff and facilities.

DESIGN FEATURES

- Three processing models:
Inspect24 – 2400 pouches/hr.
Inspect36 – 3600 pouches/hr.
Inspect54 – 5400 pouches/hr.
- New multiple spectrum analysis camera
- Login security
- On-the-fly referencing imaging streamlines database maintenance
- Analysis of each pill using 12 different parameters
- Accommodates pharmacies using both unit-dose and multi-dose packages

ACCURACY AND SAFETY

- Provides a fast electronic view of each pouch
- Analysis by visual and electronic verification
- Colour indicators flag suspect pouches
- Corrected pouches are photographed and uploaded to database
- Image retention for documentation audits from healthcare inspectors
- Pharmacy has full control of image database

LABOUR SAVINGS

- Decreases labour costs of manually handling pouches
- Significant reduction in pharmacist check time
- Streamlines and automates collation process when combined with Collector™

SPEED

- 2400, 3600 or 5600 pouches per hour
- Includes a secondary external camera to reduce downtime associated with pouch rework

MEDICATION PACKAGING AND AUTOMATION

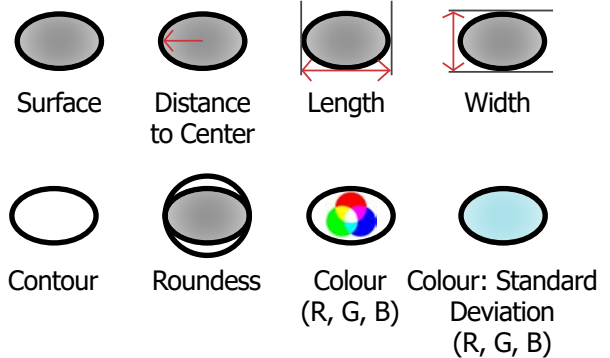

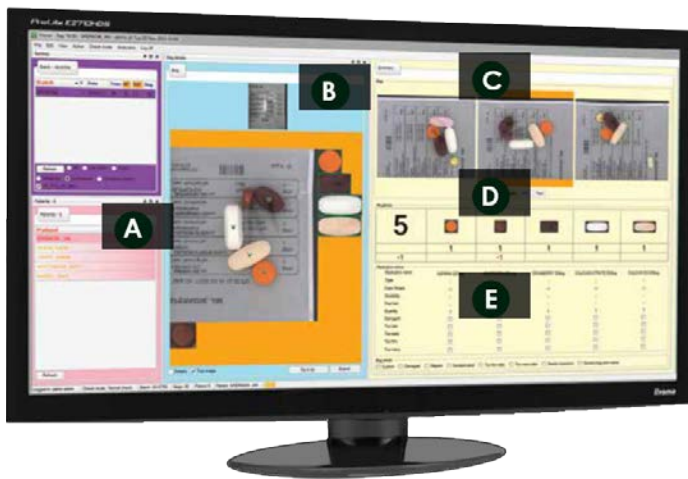

ORAL UNIT AND MULTI-DOSE PACKAGING SOLUTIONS

POUCH VERIFICATION

INSPECTRX® Visual Confirmation

ELECTRONIC INSPECTION

The InspectRx™ technology photographs the front and back of each pouch. The images are analyzed to distinguish the physical characteristics of medications using 12 different parameters, including:

- Key**
- A. Work que
 - B. Customizable
 - C. Large images showing previous and following pouches
 - D. Dashboard of reference images
 - E. Track and trend production issues for continuous improvement
 - F. Display by pass time
 - G. Display by day

CORRECTOR STATION

Each InspectRx™ includes a Corrector Station. This external photo station facilitates the correction and documentation of any pouches requiring attention.

FUNCTION	SPECIFICATIONS
SIZE	75"W × 26"D × 57"H; 112"W × 26"D × 57"H (INCLUDING COLLECTOR)

SPEED	INSPECT 24 – 2,400 POUCHES/HR. INSPECT 36 – 3,600 POUCHES/HR. INSPECT 54 – 5,400 POUCHES/HR.
POWER SOURCE	110V, 60HZ, 12 AMP & GROUND

PARATA PERL®

Pouch Inspector

Parata Perl® is designed to combine a visual inspection system with the speed, compact size, scalability, and price tag that makes sense for your pharmacy. Parata Perl® sees and interprets medications in pouch packaging more than 3x faster than the competition and with higher accuracy.

- 

With two powerful, HD video cameras, Perl® images and identifies the content of each pouch.
- 

Parata Perl® inspects up to 5 pouches per second, making it the fastest pouch inspection technology on the market.
- 

Perl® keeps up with your growing business; upgrade from Perl® to Perl® Plus anytime for faster processing speeds and more user licences.

SMART AND COMPACT

On-the-fly referencing will allow users to update the database without stopping production. The Perl® can be placed on a standard pharmacy countertop.

FUNCTION	SPECIFICATIONS

INTELLIGENT PHARMACY ONLINE SOFTWARE

PHARMALYTICS™

PharmAlytics, TCGRx's web-based business intelligence, provides actionable information to increase the pharmacy's productivity and optimize inventory with TCGRx's ATP®2 and Beacon® solutions.

- Access to vital system performance parameters, wherever you are
- Proactive email notifications if system parameters exceed the alert threshold
- Adjustable thresholds based on business requirements
- View the performance of multiple sites on one screen
- Set various permission levels for users

Improved productivity

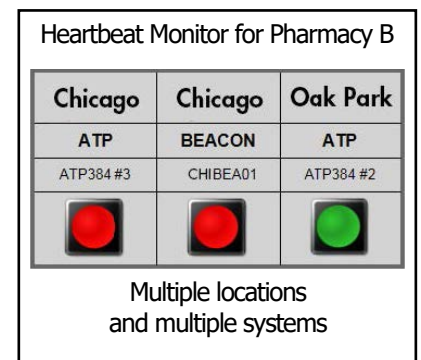

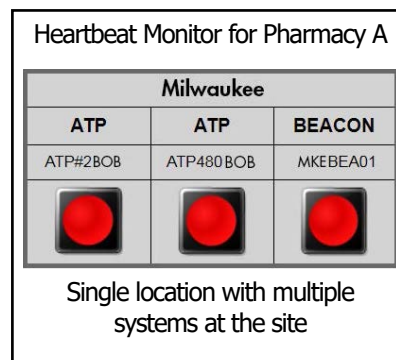

Lower operating costs

HeartBeat Overview

PharmAlytics provides an overview of the TCGRx solutions of a single pharmacy location or multiple pharmacy systems.

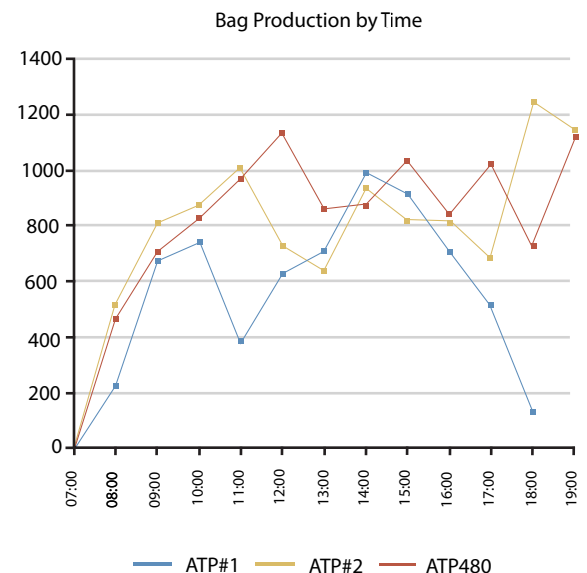

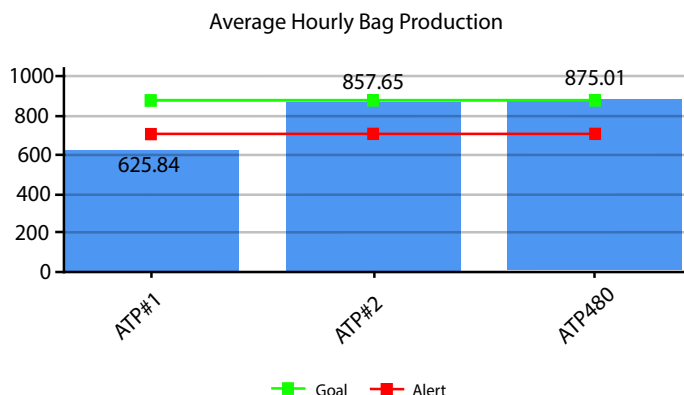

- Green** = Meets or exceeds goals
- Yellow** = Exceeds alert thresholds
- Red** = Between goal and alert threshold

Increase Productivity

Monitoring productivity and idle time is key to continuous productivity improvement. Identifying the leading causes of lost productivity leads to improved automation utilization.

- Bag production time (per hour)
- Idle time (per day) - factors that feed into this metric include tray setting, canister filling, over-dispense alarms, and no activity.

Utilization Optimization

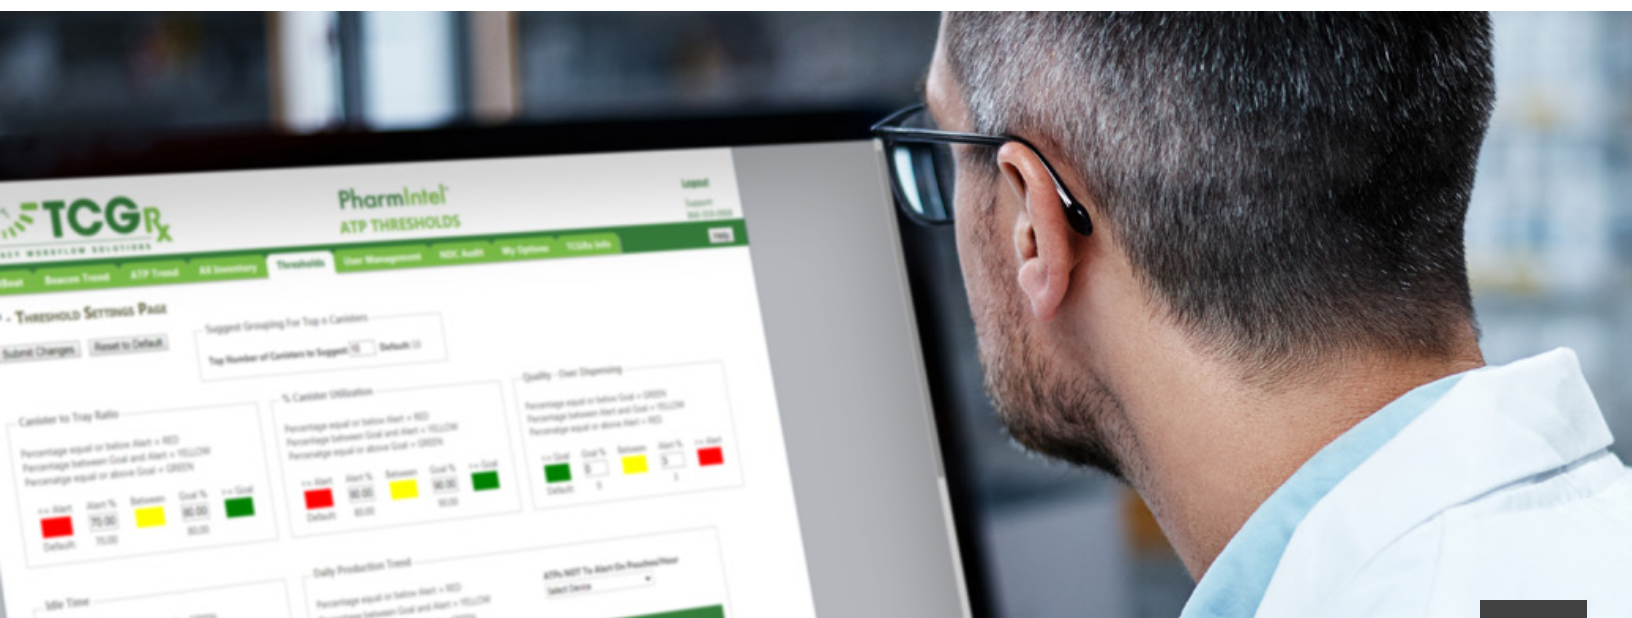

Calculated based on a user-defined period, PharmAlytics™ recommends changes for which medication to put into canisters or trays and the canister placement in the ATP®2. Maximize canister usage by

- Relocating the fastest-moving medication canisters for minimal drop time into pouches
- Move low volume medications to trays and higher-used meds to canisters to reduce labour
- Grouping canisters of high usage, large pills to reduce canister fills and lessen down time

Quality Assurance

PharmAlytics provides the ability to audit canister quality trends for continuous improvement. Three quality metrics are analyzed:

- Soon to expire meds (within 30 days)
- Expired meds – visibility to meds that are expired so they are not dispensed.
- Over-dispensing – several factors affect over-dispensing including: the canister needing replacement, canister recalibration, or the med should be trayed versus placed in canisters

MEDICATION PACKAGING AND AUTOMATION

LIQUID PACKAGING SOLUTIONS

LIQUID AND SYRINGE FILLING AUTOMATION

FLUIDOSE® Unit-Dose Packaging System

Fluidose® Unit-Dose Packaging System with a built-in syringe pump mechanism is an automated, barcoding packaging solution for unit-dose oral liquid medication. This solution assists the pharmacy in decreasing packaging costs, increasing operational efficiency, and reducing medication errors.

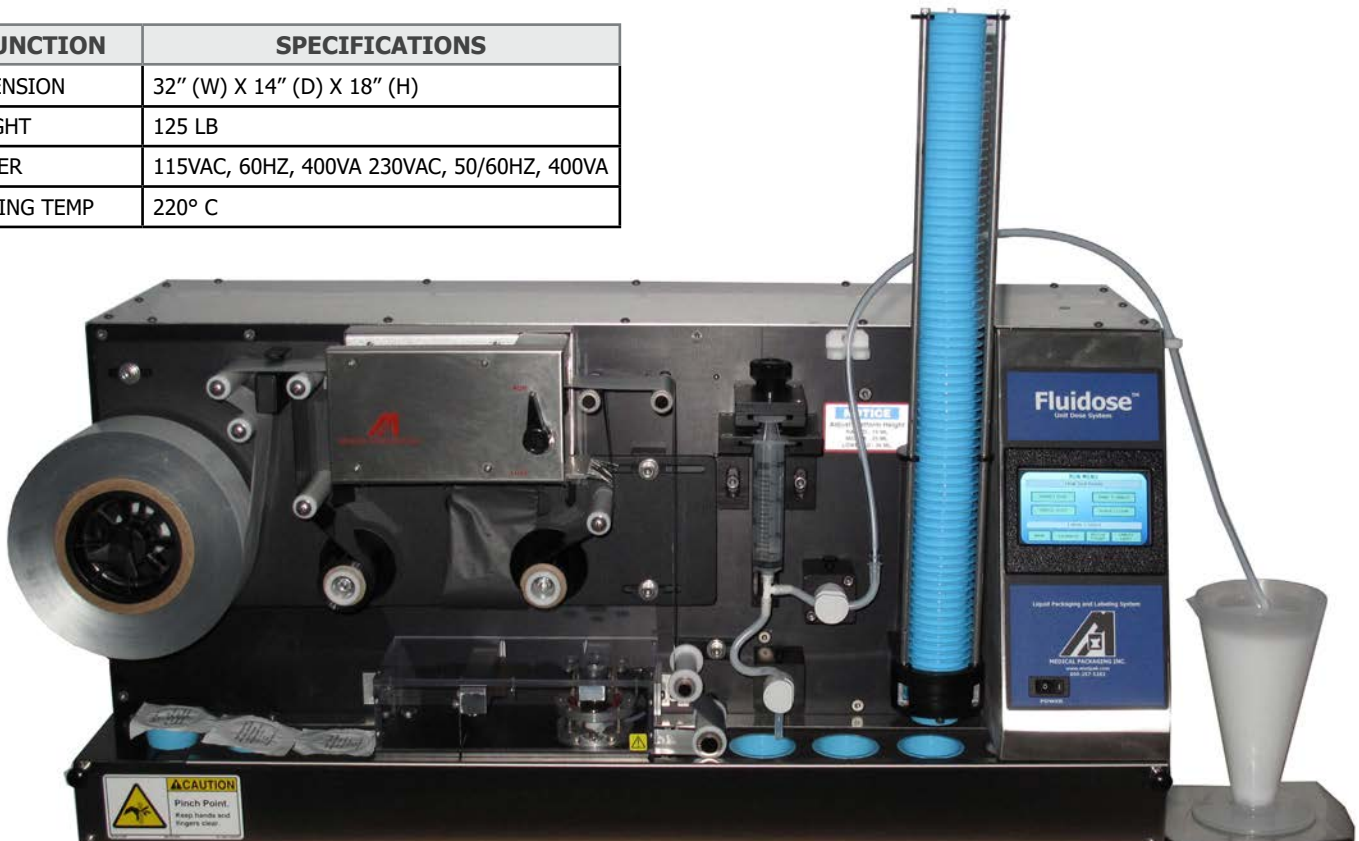

Decrease Costs

Automatic packaging of bulk liquid medication into unit-dose is most cost efficient for batch size packaging. 12-month expiration from date of packaging extends the usable shelf life of medication.

Increase Operational Efficiency

Produces up to 15 doses per minute depending on fill rate. Cups are available in four different sizes of standard blue colour (7ml, 15ml, 25ml, and 35ml) and also red for controlled or specialty medications. All materials qualify for light-resistant packaging per USP.

FUNCTION	SPECIFICATIONS
DIMENSION	32" (W) X 14" (D) X 18" (H)
WEIGHT	125 LB
POWER	115VAC, 60HZ, 400VA 230VAC, 50/60HZ, 400VA
SEALING TEMP	220° C

SMARTPHARMA

SmartPharma automated filling system is designed for batch preparations of syringes and IV minibags. The SmartPharma equipment line is designed for use in cleanrooms, LAF hoods, and isolator environments.

These systems assist in meeting USP <797> requirements. The SmartPharma product line by CARGIN will assist in providing better quality and reduce the risk of contamination. The system will reduce the risk of fatigue, filling errors, and labour costs.

Completely customizable for your filling, capping, labeling, and verification needs.

- This unit can fill 0.5mL to 60mL syringes.
- Lightweight, flexible robot arms
- Stationary or mobile platform
- Simple touch screen interface
- Plug-and-Play set-up
- Fast set-up
- Easy programming
- Space-saving design

PRECIFILL™ Oral Liquid Filling Pump

The Precifill™ Dispensing Pump is designed to accurately fill oral liquid syringes, minibags, or unit-dose pots (vials) regardless of viscosity. This simple to use pump replaces hand filling and reduces the potential for repetitive strain injuries.

- Fills oral liquid syringes or IVs with high-precision accuracy $\pm 1\%$ (volumes $>1\text{ml}$) and $\pm 2\%$ (volumes $<1\text{ml}$)
- Accurate filling of volumes as low as 0.2ml and syringe sizes as small as 1ml

COMPOUNDING AND MIXING DEVICES

THE SEVERO Electric Pill Crusher

Severo grinds pills to fine powder in seconds. When swallowing of pills is difficult, the Severo electric pill grinder is the best and safest solution for patients and healthcare professionals. It is widely used in hospitals, nursing homes, pharmacies, and veterinary clinics around the world where medicine intake is a problem and efficiency and safety a priority.

- Prevention of repetitive strain injury
- No more exposure to medication dust
- No more spills and cross-contamination
- Near silent crushing
- Ideal for administration via feeding tubes
- Fast and easy to use
- Can be mounted on carts

MEDICATION PACKAGING AND AUTOMATION

COMPOUNDING, LABELLING, AND PACKAGING SOLUTIONS

COMPOUNDING AND MIXING DEVICE

QUARTETRX Automated Oral Liquid Compounder

QuartetRx is the industry's first automated oral liquid compounding device that improves business volume and margins for pharmacies through compounding efficiency. QuartetRx can compound up to four medications simultaneously within 20 minutes using highly engineered, single-use containers and a wet milling process. It compounds oral liquid products and provides uniform dosing repeatedly and safely through improved product quality.

QuartetRx's core technology uses wet milling to reduce tablets or capsule contents to very small and uniform size particles. This process employs a specialized container with internal ribs (which perform the wet milling) and leads to smooth, palatable, and uniform dosing. This same compounding container is also used to store and dispense the product, eliminating the possibility of cross-contamination.

Enhanced safety for both pharmacist and patient

FUNCTIONS	SPECIFICATIONS

LABELLING SOLUTIONS

PALP Ancillary Medication Labelling

Palp (pharmacy accessory label printer) is a turnkey unit-dose barcode labelling solution for ancillary medication packaging (i.e., ampoules, vials, oral syringes, nebulers, inhalers, IV bags, creams, ophthalmics, etc.) to meet requirements for bedside medication verification (bmv) practice.

AUTO-WRAP® Syringe Labelling System

Auto-Wrap™ Syringe Labelling System produces a printed label and wraps it around a syringe in one single motion at the speed of up to twenty syringes per minute, regardless of syringe size.

Accommodates syringe sizes from 0.5mL up to 60mL without any need for adjustment or changing of parts. Works with any type of oral slip or injectable syringe. Open face design allows for easy loading of label stock and access to all controls.

PACKAGING AND SEALING SOLUTIONS

MTS 350™ Single Dose Sealing Automation

Combining automated filling and sealing processes our MTS-350™ provides a versatile pre-pack solution for the medium volume pharmacy. The MTS-350™ has an optional label applicator or licence plate labelling system is available.

- Easy access for cleaning of heat plate if needed
- Dual timer for unit-dose and punch card sealing
- Motorized tablet filling system with adjustable speed and easy to change brushes
- Stainless steel and anodized aluminum construction allow for easy cleaning
- Tool-less changeover of the filling system
- Seal Station automatically opens when the cycle is complete
- Easy to read digital temperature controller
- Capable of filling a wide range of medications

AUTOGEN Single Dose Sealing Automation

The premier all electric (no air required) heat sealer. Simply plug the AutoGen into any standard 110 volt outlet to begin operation.

- Medical grade seal
- Whisper quiet operation
- Dual timer for unit-dose and punch card sealing
- Removable, height adjusting base plate

Safe and easy-to-use sealing mechanism

UNIT-DOSE PACKAGING

Heat Seal Blister Cards

Heat seal blister cards are required for most pre-pack and automated packaging solutions. Our line of heat seal blister punch cards include 30, 60, and 90 day cards, mealtime cards, trap door cards, 28 day cards, 14/15/16 dose cards.

Cold Seal Blister Cards

Cold seal blister cards are the ideal solution for pharmacies dealing with low volumes and heat sensitive medications. Cold seal cards can be used in compounding pharmacies where doses can change more frequently. They are easy to use and are available in a variety of sizes.

Control Drug Blister Cards

Healthmark “control drug” blister card is a twenty dose cold seal format that is easy to package, label, store, and dispense. No problems with heat sensitive medication. Card designed to minimize space requirement in nursing cabinets.

- No need for heated sealer
- Durable medical grade seal and tear resistant card stock
- Large size blister option for hydromorphone capsules

AUTOSQUEEZE AND AUTODROP

Autodrop is a device that draws the user's gaze away while holding the lower lid gently in place.

Autosqueeze is a grip that clips around the eye drop bottle providing an ergonomic grip and extra leverage. By pressing the Autosqueeze, eye drops are successfully delivered on the first attempt, every time.

- Fits virtually all eye drop bottles
- Can be used alone or connected

INVENTORY, DELIVERY, AND SAFETY SYSTEMS

COMPLETE INVENTORY MANAGEMENT SOLUTIONS

INVENTORY MANAGEMENT SYSTEM

INTELLIGUARD® LINKED VISIBILITY INVENTORY STATION™ (RFID)

The Intelliguard® Linked Visibility Inventory Station™ or LVIS™ is an intelligent and safe stocking solution. LVIS™ is offering a quick access for care teams while improving safety and control of the inventory.

Pharmacy teams get real-time visibility to inventory data in every room, every minute of every day; care workers enjoy simple access and confidence that the right medications will be available when and where needed.

Simultaneously unlocks drawers, records a start and end time and complete a reconciliation record

Anticipates shortages and sends proactive notifications throughout the day

INTELLIGUARD® INVENTORY MANAGEMENT SYSTEM (RFID)

The Intelliguard® inventory management system uses RFID technology to provide real-time visibility and reduce hospital inventory costs for high-value, critical dose pharmaceuticals.

- Controlled temperature cabinets available in four sizes
- Improved inventory management
- Identify shortages, avoiding stock-outs

INTELLIGUARD® KIT AND TRAY MANAGEMENT (RFID)

The Intelliguard® kit and tray management system uses advanced RFID technology to automate medication inventory management and replenishment while significantly reducing required work time.

- Touch screen user interface
- All-in-one cart
- Optimize the pharmacy technician and pharmacist time allocation

SLS SAFE LABEL SYSTEM

Codonics safe label system SLS500i, honoured for its innovation, is a complete solution to enhance healthcare by improving patient safety and labelling compliance in the operating room or anywhere syringes are prepared.

- Integrated administration tool
- 2d barcode on labels
- Visual and audible confirmations

BEACON™ Inventory and Workflow Management System

Beacon's breakthrough software, storage, and retrieval system transform your pharmacy into a superbly efficient storage and pick center, organizing all medication by activity, zones, and process. You now have stations to place your fastest moving inventory, as well as bulk compartments for slower moving medications. All parts of the Beacon control system use pick-to-light for rapid location dispensing.

At the touch of a button you can produce inventory, workflow, expired medication, and Will-Call Reports. Beacon helps you train your staff in half the time and verifies their steps throughout the entire fill and delivery process.

Better control on expired medication

Decrease fill time and footprint

Ask us for a preliminary custom design of your ideal pharmacy setup, from top to bottom. We will guide you in the selection of the right configuration according to your needs, no matter the size.

H+H TRAY STORAGE DIVIDING SYSTEM

This system increases the efficiency of drug trays and boxes suitable for all drawer types and sizes. To comply with safety standards, they are also available with locked or sealable lids. The trays can be quickly removed from the drawer and replaced.

H+H FLEX STORAGE AND DIVIDING SYSTEM

H+H SYSTEM's innovative, high-quality aluminium product is a flexible system that expands easily to different widths and depths. Combined with a wide range of accessories, this is a versatile storage system that satisfies all requirements.

The H+H FlexShelf is entirely compatible with the H+H ISO modular tray system. Shelf organization systems and drawers can also be fully integrated. You can even use modular tray systems by other manufacturers.

WELLSPOT™

Improving customer service through automated supply solutions. WellSpot™ stations provide convenient access to your customers, prescriptions on demand.

Convenience for patients

- Online tracking
- Biometric identification
- Touch screen interface
- On site convenient payment methods
- Barcode, credit card, RFID-enabled readers
- Automated patient notification system

Convenience for pharmacies

- Pharmacy system integration options
- Customizable design
- Search and seize
- HIPAA compliant data encryption
- Detailed inventory and activities reports
- Manages return to stock
- Touch screen display can generate ad revenue

INVENTORY, DELIVERY, AND SAFETY SYSTEMS

MEDICATIONS DELIVERY SYSTEM

CARTS AND MED HUBS

HI-CARE E

HI-CARE E is a state-of-the-art mobile power cart with patient medication storage drawers. HI-CARE E is perfect for bedside medication.

- Add/modify equipment as needed
- Unique interchangeable drawer system
- Powerful power-supply station, capable of running up to 11 hours

HI-PARADIGM E

HI-PARADIGM E is a point of care solutions designed to securely house the computer/scanning equipment needed for bedside medication scanning as part of advanced safety initiatives.

- Can be locked to secure your notebook/tablet
- Add/modify equipment as needed
- Unique interchangeable drawer system

HI-PINNACLE

HI-PINNACLE is a mobile power cart with patient large medication storage drawers. It is often used in long-term care and chronic/rehab settings or where there is a need for expanded medication requirements.

- Can be customized to meet your specific needs.
- Bifocal friendly
- Ergonomic steering and status indicator

HI-CARE E

HI-PARADIGM E

HI-PINNACLE

HI-CORE SERIES

The HI-CORE cart is lightweight, low-cost, and available in laptop and LCD versions. HI-CORE is also available in a non-powered or powered version.

- Configurable for use with different kinds of electronics devices
- The two-tier cabinet can be configured as needed
- Interlocking dividers included for all drawers

HI-SWIFT

The HI-SWIFT cart is an adjustable, lightweight cart that redefines mobility, with only 26 pounds. This cart is constructed with lightweight materials, including plastic and aluminum. Thanks to its design, HI-SWIFT does not have the tendency to tip, as some other carts do.

- Adjustable work surface for a wide range of notebooks
- Can be manually height-adjusted and locked into any positions
- Rear accessory mount compatible with the HI-CARE E and HI-CORE

ACCESSRX

Easy-to-use software, capacity for up to 12 individual patient drawers and advanced ergonomics provide the right solution for any facility looking to improve medication delivery.

- Individually locking bins/drawers for secure medication storage
- Nursing access to patient data at the bedside

HI-CORE SERIES

HI-SWIFT

ACCESSRX

INVENTORY, DELIVERY, AND SAFETY SYSTEMS

MEDICATIONS DELIVERY SYSTEM

CARTS AND MED HUBS

EMED SOLUTION MED HUBS CARTS

The med hubs cart, by Specialty Carts, offers a safe and secure emergency dose solution that optimizes operational efficiency and safety for nursing and pharmacy while controlling cost at the same time.

- Up to 360 secured medications locations
- Efficient management of lot number and expiration dates
- Tamper-evident packaging for safety during transportation

TRANSFER CARTS

Maximize efficiency and ease workflows by teaming Howard Medical Transfer carts with POC carts. Utilizing our interchangeable cassette system, Transfer carts make it possible for a full day's medications to be cassette-transferred securely from the pharmacy and stored in Med Hub units on patient floors.

When it's time for a med pass, nurses can transfer the medication-filled cassettes directly from the Med Hub to their POC carts for safe delivery to patient rooms.

MED HUB

The Med Hub, with its interchangeable drawer system and E-Comm Centralized Control Panel, is designed to provide secure, decentralized storage for nursing stations or small wards. When it's time for a Med pass, all your meds are there, no need for extra trips to the pharmacy.

Medication-filled bins can be switched easily from the Med Hub to POC carts and transported to patient rooms.

ACCESSCENTER

The new AccessCenter™ offers the features healthcare facilities need to accurately and efficiently manage medications, while providing value and a strong return on investment.

Whether you use a decentralized or centralized medication deliver model, the system fully supports your current medication management process with single-drug control as well as the capacity to increase medication availability, even IV solutions and bulk items.

PREFILLED SYRINGES AND ORAL UNIT-DOSE PRODUCTS

ORAL LIQUID REPACKAGING

POTASSIUM CHLORIDE UNIT-DOSE ORAL LIQUID CUPS

Ready-to-use oral cups of potassium chloride unit dose

PROD. #	DESCRIPTION	QTY
HK-KCL075	7.5ML UNI-KCL ORAL UNIT-DOSE LIQUID (10MMOL)	144/CS
HK-KCL150	15ML UNI-KCL ORAL UNIT-DOSE LIQUID (20MMOL)	144/CS
HK-KCL300	30ML UNI-KCL ORAL UNIT-DOSE LIQUID (40MMOL)	80/CS

SEAFORD LIQUID MULTIVITE™

High Potency Liquid Multi-Vitamin/Mineral Formulation

Seaford Liquid Multivite™ is to be used as a nutritive adjunct when poor appetite compromises dietary intake in multiple situations, such as dehydration.

- Contains no iron, sugar, or alcohol (i.e., no constipation, diabetic, or toxicity issues)
- Especially formulated for hospital use by leading Canadian nutritional experts
- A convenient and economical alternative to tablet crushing
- Pleasant orange flavour

PRODUCT #	DESCRIPTION	QTY
SF-MV240	HIGH POTENCY LIQUID MULTI-VITAMIN/MINERAL, 240 ML	144/CS

DOSES	INGREDIENTS
5000 I.U.	VITAMIN A (RETINOL)
4.5 MG	VITAMIN B1 (THIAMINE)
3 MG	VITAMIN B2 (RIBOFLAVIN)
20 MG	VITAMIN B3 (NIACIN)
6 MG	VITAMIN B5 (CALCIUM D-PANTOTHENATE)
2 MG	VITAMIN B6 (PYRIDOXINE HYDROCHLORIDE)

199 MCG	FOLIC ACID
55 MCG	SELENIUM
12 MG	ZINC

PREFILLED SYRINGES AND ORAL UNIT DOSE PRODUCTS

SALINE, SODIUM CITRATE AND HEPARIN SYRINGES

PRAXIJECT™ SALINE **Sodium chloride 0.9%** **Sterile Field Compatible**

The syringes are packaged in sterile peel pouch for use anywhere in the hospital, including sterile field applications. Praxiject™ is the only 20ml saline prefilled syringe on the market, allowing a more turbulent flush.

- Zero reflux
- 24 month expiry dating
- Preservative free, latex free

PRODUCT #	DESCRIPTION	QTY
MR-37053	SALINE, 3ML OF 0.9% SODIUM CHLORIDE IN A 10ML SYRINGE. SF	100/CS
MR-3705C	SALINE, 10ML OF 0.9% SODIUM CHLORIDE IN 10ML SYRINGE. SF	100/CS
MR-3706	SALINE, 20ML OF 0.9% SODIUM CHLORIDE IN 20ML SYRINGE. SF	60/CS

ZR® BRAND SALINE **Sodium chloride 0.9%** **Sterile Path**

- Terminally sterilized fluid pathway
- Zero reflux
- 24 month expiry dating

PRODUCT #	DESCRIPTION	QTY
EX-S3	SALINE, 2.5ML OF 0.9% SODIUM CHLORIDE IN A 3ML SYRINGE	100/CS
EX-10031	SALINE, 3ML OF 0.9% SODIUM CHLORIDE IN A 10ML SYRINGE	100/CS
EX-S510	SALINE, 5ML OF 0.9% SODIUM CHLORIDE IN A 10ML SYRINGE	100/CS
EX-S10	SALINE, 10ML OF 0.9% SODIUM CHLORIDE IN A 10ML SYRINGE	100/CS

CITRAFLOW™ **Sodium citrate 4%** **Sterile Field Compatible**

Ready-to-use Sodium Citrate 4% prefilled syringes, the natural way to lock catheters. Available in a convenient twin pack* for dual lumen catheter locking. Citraflow™ is a safe alternative to heparin.

- The 3 ml fill volume enhances best clinical practice.
- 30 month expiry dating

PRODUCT #	DESCRIPTION	QTY
MR-38543-1	3ML 4% SODIUM CITRATE SOLUTION USP IN A 5ML SYRINGE. SF TWIN PACK *	200/CS
MR-38553	3ML 4% SODIUM CITRATE SOLUTION USP IN A 10ML SYRINGE. SF	100/CS
MR-3854	5ML 4% SODIUM CITRATE SOLUTION USP IN A 5ML SYRINGE. SF	120/CS

CITRAFLOWPLUS™

Sodium Citrate 4% w/Ethanol 30%

Sterile Field Compatible

CitraFlowPLUS™ combines in one syringe the anticoagulant properties of sodium citrate PLUS the antimicrobial properties of ethanol. This solution combination prevents biofilm formation, reduces incidences of CRBSI (catheter related blood stream infections) and is a safe alternative to heparin.

PRODUCT #	DESCRIPTION	QTY
MR-38453	3ML SODIUM CITRATE 4% AND ETHANOL 30% IN A 10ML SYRINGE. SF	100/box

HEPARIN LOCK/FLUSH

Sterile Path

Low dose heparin prefilled syringes in 100 units/mL and 10 units/mL for heparin lock/flush applications.

PRODUCT #	DESCRIPTION	QTY
EX-HH5	5ML HEPARIN IN A 10ML SYRINGE	100/CS
EX-HT5	5ML HEPARIN IN A 10ML SYRINGE	10/CS
