

scripClip™

Your Search is Over.

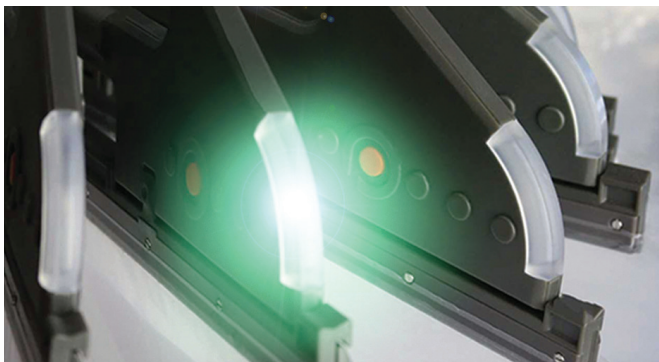

**Right Bag, Right Customer,
Everytime.**

The scripClip™ will call system helps pharmacy staff quickly and efficiently locate the right bag for the right customer, every time.

ScripClip™ is available in a hanging bag or a clip format. Once a prescription has been filled and verified, a scripClip™ bag/clip is scanned and assigned to a customer's Rx.

At pickup, pharmacy staff simply keys the customer information and the appropriate ScripClip™ tagged prescription will light up. Different colored lights are uniquely associated with each console, supporting multiple concurrent transactions.

Key Features

- Increases productivity & operational efficiency
- Identifying LED lights enable bags to be organized in any order.
- Provides faster retrievals for your customers.
- Makes the return-to-stock process easy & quick.
- Works with existing storage systems
